»CHM8X Platform – Modular Crash Hardened Memory!«

Deuta America Modular Crash Hardened Memory

Deuta America Corporation is an international leading supplier in rail crash hardened memory (CHM) with almost ten different CHM products in service around the world.

Our new CHM8X product line is the cutting edge of innovation for crash protected memory solutions across markets and applications, allowing for the simple addition of crash memory to any system. The CHM8X is small, light, and can be either 19" rack mounted or bracket mounted.

Scalable, cost-efficient protected memory for data and video across multiple standards in a compact footprint.

»CHM82 – According to IEEE1482.1:1999 – Modular Crash Hardened Memory!«

Add high capacity Crash Hardened Memory to a IEEE1482.1:1999 system

This flexible CHM unit provides up to 1.5TB memory capacity in a small package supporting both 19" rack mounting or bracket mounting options. Default connection is a 90cm USB cable with a M8 4 pole connector.

The memory can be expanded from 16GB up to 1.5TB. Through the small size, the unit can be mounted separately, integrated in a 19" rack or even mounted inside an event recorder or a network video recorder.

»CHM84 – According IEEE2013/FRA 49CFR data – Modular Crash Hardened Memory!«

A small size and low weight Crash Hardened Memory still meets all the existing crash protection standards for the railway industry and provides memory capacity up to 128GB.

The design is flexible and modular and can be delivered with multiple bracket mounted designs and 19" rack mounted designs. The unit can be used as a standalone protected memory or integrated into a recorder. The unit provides a USB connected interface with multiple connectors and cable length.

»CHM26 & CHM86 – According IEEE2013/FRA 49 CFR video – Modular Crash Hardened Memory!«

Easily Add IEEE/FRA Crash Hardened Memory to Existing Systems!

Applied to IEEE1482.1: 2013 and FRA 49 CFR 229 standards, both CHM26 and CHM86 Crash Hardened Memory Unit allows for effortless integration to new or existing systems. The CHM26 is today offered with 256 GB, 512 GB or 1 TB capacity and 1.5 TB future capacity while the much smaller CHM86 will be offered up to 1 TB capacity. Both units utilize an on-board ethernet network interface, adding Crash Hardened Memory is simple and straightforward requiring minimal modifications to existing systems.

CHM26 Highlights:

- 256 GB, 512 GB or 1 TB memory capacity, 1.5 TB to be released
- Ethernet communication
- Web-based service PC interface
- 24 – 110 V DC wide-range power supply
- FRA 49 CFR Part 229, § 229.135 Appendix D
- IEEE Std. 1482.1-2013, Part 4.6
- Optimized for video data protection
- On-board processing capabilities

CHM86 Highlights:

- Up to 1 TB memory capacity
- Ethernet communication
- Web-based service PC interface
- Power over Ethernet power supply
- FRA 49 CFR Part 229, § 229.135 Appendix D
- IEEE Std. 1482.1-2013, Part 4.6
- Optimized for video data protection
- On-board processing capabilities
- S.M.A.R.T.-like memory diagnostic interface
